

OCTOBER 2016

# BETA BAYOU

DUTCHESS BOCES — BETA NEWSLETTER

## WALKWAY OVER THE HUDSON

# BETA BAYOU

Did you see the 3D printer in room 233? It has been printing phone cases, Pokémon and Halo figurines, name tags, dice, a globe, a large owl, a cube, a pick, a dog tag, a bracelet, a nut & bolt, a chain and many more random items. It's on loan for us to experience the world of 3D printing. Ms. White believes that students will see 3D printers at their jobs and perhaps have one at home. Some classes watched movies about 3D printed foods, medical uses for 3D printers, and a video of real size 3D printed houses.

Phone case and personalized dog tag printed on the 3D printer.

## Sports by Collin R.

The MLB playoffs are here this is exciting for baseball fans the Mets play the Giants for the wild card. The NBA season is coming up the NBA is a very exciting sport. The NFL is here on it is week 5 there are only three undefeated teams left the Broncos 4-0 the Vikings 4-0 the Eagles 3-0

Recycling Boxes are located in the lobby for: Batteries', phones, printer cartridges, newspaper, eyeglasses  
Recycling boxes for bottles and cans are in classrooms.

### TIPS

- ◆ Go To Goodwill for your Halloween costume
- ◆ Re-use decorations

## REPTILE CLUB

What we would be doing in the reptile club is learning about reptiles and how to take care of them. Some lizard and snakes don't need certain types of light so if they were nocturnal they would need about 75 watts black light. But if they were awake in the day time they would need some type of basking light. Leopard geckos, Ball Pythons, Bearded Dragons are just a few reptiles that we will be learning about. We will also be learning about what these reptiles eat and how they live. Like Ball pythons eat mice or rats when leopard geckos can eat wax worms, meal worms, pinkies (just born no hair) and other types of small animals, and Bearded dragons eat same thing as leopard geckos besides they can eat pinkies with (Hair doesn't have to be just born). If you don't know what pinkies are they are baby Mice or Rats?

Wax worms look like this and

Meal worms look like this.

Pinkies look like this

When we learn about iguanas you will learn that they only eat vegetables and they come out during the day. Come to Jacob S. for more information on

## REPTILE LIFE.

**October 2016**
