Introduction

Orchards full of apples, pears, and peaches, farms exploding with vegetables, blueberries growing wild over the mountains, maple syrup flowing freely into buckets, and grass-fed cows dotting pastureland are just some of the wonderful things that make this area a culinary dream. It is our passion for this region and its foods that inspired the students of the Dutchess County Board of Cooperative Educational Services Career and Technical Institute to publish this cookbook. We come from different towns, different backgrounds, and we have very different personalities, but we all share a connection to food and this region. Over the last two years here at CTI, we have not only learned to cook food, but also to bring all kinds of people together to share new tastes and create memories.

The title of this cookbook, *Four Seasons, Five Senses, One Valley*, expresses our collective love of the culinary arts and the Hudson Valley. Local, seasonal foods are the ingredients chefs love. Not only are they the freshest and most flavorful, using foods from local sources also supports the local economy and reduces the amount of energy spent to get food from the field to our plates. For these reasons we decided to focus on local, seasonal foods from the Hudson Valley region, and we wanted these recipes to appeal to all five senses. We hope the foods you create with these recipes look and smell appetizing, roll over your tongue to wake up your taste buds, and even sound good, as you bite into a crisp, locally grown apple, or listen to a steak sizzle. Although we tried to use mostly ingredients from the Hudson Valley, there are some foods that may have to travel a ways to reach your kitchen. We decided that you wouldn’t mind this since the recipes are too delicious to leave out.

We know that as we grow and then leave the Culinary Program here at CTI to join the workforce or continue our studies at institutions like the Culinary Institute of America in Hyde Park, NY, or Johnson and Wales in Providence, RI, we can recreate fond memories simply by leafing through this book and preparing one of the dishes learned from Chef Daniel Tierney and Chef Darcy Sala. We hope you enjoy sharing some of these memories with us as you try the recipes in this book for yourselves.

When it comes to seasons, the first thing that comes to mind is spring. I can’t think of one thing that I don’t like about this season -- from its clear blue skies and the 70 degree weather, to the refreshing rain showers that bring forth the stunning, beautiful flowers. My greatest memories from this time of the year are from when my Uncle Joe has his annual Memorial Day parties. There is always so much amazingly delicious food ranging from the standard cookout food to filet mignon, racks of lamb, ribs, and strawberry shortcake made with super sweet strawberries from our local farm-stand for dessert.

What makes spring a good season for cooking? This is the perfect time to gather extremely fresh ingredients. When I think of spring, I think of fruits and vegetables and the many local farms producing these seasonal ingredients. Spring’s seasonal foods include asparagus, sugar snap peas, fiddlehead ferns, kohlrabi, spinach, and fingerling potatoes. All these ingredients are the best from March to May when they are in peak flavor and freshness.

**Ingredients:**

1 pound pasta (angel hair or spaghetti)  
2 large eggs

1/2 medium onion, diced  
2 cups grated Romano cheese  
1 cup peas, fresh cooked

Freshly ground pepper

Summer

Summer is the season of flavor and fun. Most of the fruits and vegetables we eat are grown and harvested in the hot and sunny weather. For example, squash, tomatoes, corn, beans, peppers, onions, cucumbers, okra, eggplant, sweet potatoes, peaches, watermelon, cantaloupe, honeydew, pears, plums, raspberries, and blueberries are just some of the many foods that ripen in the hot summer sun.

Another part of summer is the gathering of family and friends to make lasting memories. One of my own favorite memories is walking down to the garden with my dad to pick out fresh and succulent home grown vegetables. We walked up and down the aisles of the garden in the back yard putting the mouth-watering vegetables in our baskets before the heat became too strong to endure any longer. After gathering our valuable crop we made our way back to the house and prepared a variety of vegetable dishes. In my mind I remember saying “Who knew such a feast can be made with things right from our back yard.” At that moment I realized summer was the season of flavor. I mean, sure, spring, autumn, and winter all have wonderful crops, but nothing compared to summer’s bounty. Summer picnics and poolside barbecues, along with a myriad of outdoor activities with friends and family, offer the perfect mix of food, flavors, and fun.

Fall—when the air gets crisp, and the leaves start to change. The Hudson Valley is at its best. This season is great for cooking; the temperature starts to drop, and it is the start of hearty stews and soups and even better, pies. I love the atmosphere of fall. I love the smell, and I love the feeling. There is nothing better than going on an autumn hike in the woods while the trees are blazing with color, then coming home to sit by a warm crackling fire, watching a Giants game and eating a flavorful meal cooked for you with love while you were out. The only thing that could make that day more perfect is a win for the Giants and some apple pie for dessert.

Thanksgiving Leftover Turkey Croquettes

Hello, my fellow food enthusiasts! I present you this dish that I originally created for a nation-wide scholarship contest held by the Culinary Institute of America. The criteria of the contest simply consisted of creating a dish using Thanksgiving leftovers. I recorded a five-minute video demonstration of my dish and submitted it along with a photograph. My recipe was selected as one of the top seven finalists. As a finalist my video demonstration was placed on youtube.com for further voting where I was ranked fourth in the nation. Although I did not receive an award or scholarship, I was thrilled for the recognition. This was the first dish I ever created from scratch, and I’m glad that I can share it with others. Bon Appetit!

—Sean Stoorvogel

Yield: 6 servings

Croquette Ingredients:
1 cup turkey, cooked, finely chopped
1/2 cup stuffing
1/4 cup corn
1/4 cup green peas
4 cups mashed potatoes
1/4 teaspoon cayenne pepper
2 teaspoons fresh parsley, rough chop
1 tablespoon granulated garlic
2 eggs
3 cups all purpose flour
2 cups Panko bread crumbs
1 cup Pecorino Romano cheese, grated
Vegetable oil, for frying

Cranberry-Shiitake Turkey Gravy Ingredients:
2 shallots minced
1/2 cup sherry wine
2 cups shiitake mushrooms sliced
1/4 cup cranberries, fresh or frozen
3 cups turkey gravy
1 ounce butter
Method for Croquettes:

1. Season cooked turkey with cayenne pepper, garlic, salt and pepper.
2. In a large mixing bowl, add stuffing, corn and green peas to seasoned turkey and mix together well. Set aside.
3. Take mashed potatoes and flatten them into a small patty about 4-5 inches in diameter*.
4. Take a heaping tablespoon of the turkey mixture and place in the middle of the mashed potato patty.
5. Form the mashed potato around the turkey filling making a ball. Once formed only the mashed potato should be on the outside and turkey filling on the inside.
6. Dip croquette in all-purpose flour**, then the eggs, then the Panko bread crumb and Pecorino Romano cheese mixture.
7. In a large saucepan heat 2 inches of the oil until a deep-fat thermometer registers 365°. In the saucepan, fry the croquettes in batches for 1 to 1 1/2 minutes on each side or until they are golden brown, and transfer them with a slotted spoon to paper towels to drain.

Method for Gravy:

1. Sauté shallots in butter.
2. Add sherry and cranberries and reduce for about 3 minutes.
3. Sauté sliced shiitake mushrooms in a separate pan and let simmer 3-5 minutes.
4. Add 1 cup of turkey gravy to pan with cranberries; let simmer 3-5 minutes then strain to remove cranberries and seeds.
5. Once strained, pour sauce back into sauté pan and add 2 additional cups of turkey gravy.
6. Add cooked shiitake mushrooms, butter, sugar, and heavy cream. Let simmer for 2 minutes and pull. Serve hot under croquettes.

Chef’s Notes:
* Work cold potatoes with your hands to make them more consistent and less likely to break apart before forming your patty.
** During the first stage of breading make sure that there is only enough flour to thinly coat the croquette.

Winter

Winter is a great time to bundle up and make all different varieties of hearty comfort foods. It is also a wonderful time of year to cook because when it becomes too frigid outside, you can warm up to a delicious home cooked meal. There are all types of dishes that are perfect to prepare for the winter season. A thick and meaty chili or beef stew is excellent to start off your cold and wintry afternoon. Once dinner comes and the snow drifts away, a warm cheesy baked ziti or chicken parmesan will please your taste buds and fill your stomach for the night. Aside from the great food that winter has to offer, there are awesome snow sports such as snow tubing, sleigh riding, snow boarding and skiing. These are not only great for exercise and entertainment, but they can help you work up an appetite for more delicious winter food. In case you are trying to keep a slim figure for the summer with all of these snow sports, you can dive into all sorts of flavorful healthy soups. Winter is great for making Italian wedding soup, chicken noodle, split pea, or even a creamy clam chowder to warm up your bones.

I have very fond memories of winter. I would sleigh-ride down hills all day long until I heard the sound of my mother’s voice calling me inside for hot chocolate and warm pasta fagioli. This special winter meal was always greatly appreciated when I was covered in frosty snow from all of my hand-crafted snow-men. I enjoy all of the other seasons, but winter has always been my favorite because of the thick, meaty, hot and fulfilling foods that are best made in the cold winter season.

20 Ritz crackers (finely crushed)
1 tablespoon fresh dill (finely chopped)
1 clove garlic (minced)
1/4 cup Pecorino Romano cheese (grated)

Stuffing Method:
1. Cook potatoes leaving the skin on until proper doneness. When finished place in large bowl and mash. Heat heavy cream until simmer, mix with cheese and add to mashed potatoes. Set aside.
2. Combine remaining ingredients and add to potato mixture. Combine until mixture is thick and moist. Set aside.

Pork Loin Method:
1. Place onion, celery, and carrot on bottom of roasting pan. Add one teaspoon each of salt and pepper. Set aside.
2. Place the loin upside down, and slit down the middle causing it to open up like a book. Place stuffing down the middle of the lion and close.
3. With butcher’s twine, tie knots in the lion about every inch just to keep it closed, but loose enough so the stuffing doesn’t come out the ends.
4. Place loin stuffing side down on a wire rack over vegetables in the roasting pan, and season with the remaining salt, pepper, and sugar.
5. Place in 350° oven and roast until outside is golden brown, and loin reaches an internal temperature of 150°. Let rest, remove twine, and enjoy!
**Moussaka**

Yield: 12 servings

Ingredients:

- 2 large onions (peeled and diced)
- 2 tablespoons olive oil
- 2 tablespoons butter
- 2 cups mushrooms, minced
- 1 pound ground beef, turkey, or lamb
- 3 canned tomatoes (peeled and pureed)
- 3 tablespoons tomato paste
- 3/4 cup dry wine
- 1/2 cup parsley (chopped)
- 1 teaspoon cinnamon
- 1 tablespoon garlic (freshly chopped)
- 1 tablespoon oregano
- 1 teaspoon sugar

**Béchamel Sauce:**

- 4 cups milk
- 1/2 cup butter
- 6 tablespoons flour
- 1/8 teaspoon nutmeg
- 1/4 teaspoon white pepper

**Topping:**

- Olive oil
- 3 lbs eggplant
- 2 cups ricotta cheese
- 1 cup dry breadcrumbs
- 2 cups parmesan cheese, grated
Moussaka Method:

1. Sauté onions in 2 tablespoons oil and 2 tablespoons butter over moderate heat until they are soft and lightly colored (about 8 minutes). Add mushrooms and sauté. Add ground meat and sauté until browned. Stir in tomatoes, tomato paste, wine, parsley, seasonings and sugar.

2. Reduce heat to low and simmer uncovered, for 30-45 minutes, stirring occasionally, until most of the liquid has evaporated, and the mixture is quite thick. Remove skillet from heat and let it cool completely.

3. Start seasoning the eggplant: peel eggplants and slice vertically, 1/8 to 1/4 inch thick. Sprinkle lightly with salt and let sit for 30 minutes.

4. Now make the Béchamel sauce. Use a mixer or blend by hand the egg and ricotta mixture. Place the milk in a saucepan, and heat it just until tiny bubbles appear along the edges. Remove and set aside.

5. Melt the butter in 3-quart saucepan over very low heat until foamy, being careful not to brown. Slowly add the 6 tablespoons flour, stirring constantly until smooth (3-4 minutes), and still being careful not to let it brown.

6. Add the milk slowly, whipping with a wire whisk. When the mixture is thick and smooth, remove it from the heat and stir in seasonings.

7. Stir ricotta cheese until it is smooth and creamy. Gently fold it into the béchamel sauce. Stir in beaten eggs until thoroughly incorporated.

8. Back to the eggplant: rinse well with cold water; squeeze gently and pat dry. Dredge the eggplant in 1 1/2 cups flour, and sauté each in olive oil until it is brown on both sides.

9. Remove and discard any excess oil that has risen to the top of the tomato mixture. Lightly grease a 16x10 baking pan that is at least 3 inches deep, and sprinkle the bottom with a few breadcrumbs.

10. Place a layer of eggplant in the pan, and follow with a layer of the tomato mixture. Sprinkle with breadcrumbs and grated cheese. Repeat as many times as you have eggplant to last. Pour the béchamel-ricotta sauce over the top and bake at 300 ° for one hour, or until a golden-brown crust has formed on the top.

11. Remove moussaka from oven and let it stand undisturbed 20-30 minutes before serving; the delay allows the layers to fuse.

**Hungarian Beef Goulash**

This is a dish that Master Chef Fritz Schonnenschmidt of the CIA demonstrated for us here at CTI BOCES last winter. There are less than 100 master chefs in the United States, and we felt honored to have Chef Schonnenschmidt visit us and teach us this recipe. We hope you enjoy it as much as we did.

Yield: 10 servings

Ingredients:

2 pounds onions, sliced  
2 tablespoons olive oil  
1 tablespoon apple cider vinegar  
4 tablespoons sweet Hungarian paprika  
1 teaspoon marjoram, powdered  
3 garlic cloves, minced  
1 teaspoon lemon zest  
1 teaspoon Kosher salt, or to taste  
1 quart beef stock  
4 ounces tomato paste  
5 pounds beef shank or cubed beef for stewing

Method:

1. Sauté the onions in oil until they are brown.  
2. Add the vinegar, spices, garlic, lemon zest, and salt; Cook over moderate heat until nearly dry.  
3. Add the stock and tomato paste and bring the mixture to a simmer.  
4. Add the beef shank, cover the pan, and braise it until the meat is very tender, approximately 1 1/2 hours or longer.  
5. Degrease the sauce and adjust the seasoning with salt and pepper to taste.
**Boston Clam Chowder**

Yield: 1 quart

Ingredients:

3 14 ounce cans canned clams/with juice  
4 cups fish stock or water  
4 strips bacon, chopped  
1 medium onion, chopped  
2 stalks celery, chopped  
1 clove garlic, chopped  
1 teaspoon thyme  
2 medium potatoes diced  
3 tablespoons roux  
1 cup cream  
1 cup milk  
A dash of Tabasco, to taste  
A dash of Worcestershire sauce  
Salt and pepper to taste  
1/4 teaspoon mace

Method:

1. Simmer the potatoes in the clams, clam juice and fish stock or water until just tender. Allow the potatoes to cool in the liquid.
2. Combine the milk and cream, warm to a simmer, and reserve.
3. In a large saucepan sauté the bacon until lightly browned. Add the onions, celery, and continue to cook until the vegetables are almost tender. Add the garlic and thyme and continue to cook 2 to 3 minutes.
4. Add all of the liquid from the clams and the potatoes, bring to a simmer and add enough roux for a medium consistency. Simmer for another 15 to 20 minutes.
5. To finish the soup, add the potatoes, the cooked clams, and the warm milk and cream. Return to medium heat and just bring soup to a simmer. Be very careful that the soup does not boil because it may separate and lose its smooth texture and become grainy. If this happens, strain all of the ingredients from the soup and blend the liquid in a blender. Then add the solid ingredients back into the soup.
6. Adjust seasoning with Tabasco, Worcestershire, salt, pepper, and mace. Serve hot.
Chowder
To make a good chowder and have it quite nice
Dispense with sweet marjoram, parsley and spice;
Mace, pepper and salt are now wanted alone.
To make the stew eat well and stick to the bone,
Some pork is sliced thin and put into the pot;
Some say you must turn it, some say you must not;
And when it is brown, take it out of the fat,
And add it again when you add this and that.
A layer of potatoes, sliced, quarter inch thick,
Should be placed in the bottom to make it eat slick;
A layer of onions now over this place,
Then season with pepper and salt and some mace.
Split open your crackers and give them a soak;
In eating you'll find this the cream of the joke
On top of all this, now comply with my wish
And put in large chunks, all your pieces of fish;
Then put on the pieces of pork you have fried
I mean those from which all the fat has been tried.
In seasoning I pray you, don’t spare the cayenne;
’Tis this makes it fit to be eaten by men.
After adding these things in their regular rotation
You’ll have a dish fit for the best of the nation.

Meat Lover’s Pizza
Grilled pizza is a surprising and delicious way to utilize seasonal ingredients. All you need is some pizza dough, a grill, and some imagination to create countless variations of mouth-watering pizza with whatever fresh produce is available. Pizza dough is very easy to make at home, but if you are short on time, it is also easy to buy at any pizza place and many grocery stores. We have included five of our favorite varieties here, but feel free to substitute any toppings you can think of to invent your own grilled pizza masterpiece!
**Basic Grilled Pizza**

Yield: Two 12 inch pizzas

Dough Ingredients:
1 cup warm water
1/4 teaspoon sugar
1 envelope (1/4 ounce) active dry yeast
2 3/4 cups unbleached all-purpose flour (plus more, for dusting)
1 teaspoon salt
1 1/2 tablespoons olive oil

Method:
1. In a small bowl, sprinkle sugar and yeast over warm water; stir with a fork until the sugar and yeast are dissolved. Let stand until foamy, about 5 minutes.
2. In a food processor, pulse flour and salt to combine. Add yeast mixture and oil, then pulse until the mixture is slightly tacky (dough should pull away from your fingers when you squeeze it).
3. Turn dough onto a lightly floured work surface. Knead to form a smooth ball.
4. Place the dough in a lightly oiled bowl, smooth side up. Cover with plastic wrap and let rise in a warm place until doubled in bulk, about 30 to 40 minutes.
5. Punch down dough and turn onto a lightly floured work surface. Divide dough into two equal pieces. Knead each a few times, then form a smooth ball. Return one ball to oiled bowl. Pat remaining ball into a flat disk and cover with plastic wrap. Let rest 5 minutes.
6. Using your hands or a rolling pin, stretch or press dough into desired shape, always working from center outward. Place on a cookie sheet.

Method for Grilling Pizza dough:
1. Preheat your grill to medium high.
2. Brush the top of the pizza dough with olive oil, then flip, oiled side down, onto the hot grill. Work quickly to return the dough to your desired shape on the grill.
3. Allow grill to cook until bubble start to form on top. Then begin checking the bottom periodically. When the bottom is golden and a bit stiff, brush oil on the top and flip the dough over.
4. Cook until the bottom is also golden. Then proceed with one of the following recipes.

We opened the CTI bakery to see what it would be like to run a real world business. Our attempt at opening the bakery was a huge success. Our customers always came back for more each time we were open. They were hooked on our goodies. We always had a long line stretching all the way out of the dining room.

The hardest thing about the whole bakery operation was that some of the students didn’t like making the same things over and over every week. I, personally, loved it. To have a great business, enthusiasm has to be a part of the process. Things like that do happen in the real world though. Every business is made to run in a utopian style, but most of the time, not everything goes the way it was expected to be. The best thing about the bakery operation was that it gave me and some others an experience of what it would be like in the future for us since we’re going to be bakers. Making one dessert, cleaning up and moving right into the next one was pretty much what we did. The customers (the staff) loved the bakery. We started each afternoon with a full case of goods and ended the day with pretty much nothing left. Some of the best sellers were the flan cake, death by chocolate cake, and the chocolate mud puddle cookies.

Our top seller was by far the death by chocolate cake that I personally made. A funny thing that happened was that one of the men who bought this cake every week said, “It doesn’t matter what kind of trouble I’m in with my wife, as long as I bring home a slice of this cake . . . I’m golden.” We hope you enjoy these recipes that we tested in our bakery. We can guarantee that who ever you make them for will think that you are golden too!

**Ode to Chocolate**

- My love, how are you today?
- Dark and mischievous?
- White and bright?
- Smooth and milky?
- How can I fulfill your desires?
- Shall I devour you?
- Melt you? Drink you?
- I'm here for you.
- I have a sickness.
- Can you help me figure out what it is?
- It gives me cravings for something sweet.
- Something smooth and delightful.
- Something rich and sinful.
- Something with a delicious aroma.
- I need a cure.
Cake Method:

1. Adjust oven rack to middle position; heat oven to 350°. Grease two 9-inch round by 2-inch high cake pans with softened butter; dust pans with flour and knock out excess.

2. Combine chocolate, cocoa powder, and hot water in medium heatproof bowl; set bowl over saucepan containing 1 inch of simmering water and stir with rubber spatula until chocolate is melted, about 2 minutes. Add 1/2 cup sugar to chocolate mixture and stir until thick and glossy, 1-2 minutes. Remove both from heat and set aside to cool.

3. Whisk flour, baking soda, and salt in medium bowl.

4. Combine buttermilk and vanilla in small bowl.

5. In bowl of standing mixer fitted with whisk attachment, whisk eggs and yolks on medium-low speed until combined—about 10 seconds. Add remaining 1 1/4 cups sugar, increase speed to high, and whisk until fluffy and lightened in color, 2 to 3 minutes.

6. Replace whisk with paddle attachment. Add cooled chocolate mixture to egg/sugar mixture and mix on medium speed until thoroughly incorporated, 30 to 45 seconds, pausing to scrape down sides of bowl with rubber spatula as needed.

7. Add softened butter one tablespoon at a time, mixing about 10 seconds after each addition.

8. When butter is incorporated, add about one-third of flour mixture followed by half of buttermilk mixture, mixing until incorporated after each addition (about 15 seconds). Repeat using half of remaining flour mixture and all of remaining buttermilk mixture (batter may appear separated). Scrape down sides of bowl and add remaining flour mixture; mix at medium-low speed until batter is thoroughly combined, about 15 seconds.

9. Remove bowl from mixer and fold batter once or twice with rubber spatula to incorporate any remaining flour. Divide batter evenly between prepared cake pans. Smooth batter to edges of pan with spatula.

10. Bake cakes until toothpick inserted into center comes out with a few crumbs attached, 25 to 30 minutes. Cool cakes in pans 15 minutes, then invert onto wire rack. Cool cakes to room temperature before frosting, 45 to 60 minutes.
**Chocolate Death Cake** (continued)

Method: Ganache

1. Heat cream to just under a boil.
2. Pour over chocolate in a heat proof bowl. Stir to melt chocolate.
3. Set aside to cool. Use when it is spreadable (about 30 minutes).

Frosting the cake:
1. Place one cake on a platter and coat with ganache. The easiest way to do this is to use a pastry bag, as the frosting will be quite thick. If you do not have a pastry bag, just gently spread the frosting directly onto the cake. The frosting will be thick—if it is too difficult to work with you may need to warm it up before it is spreadable.
2. Top the first layer with the second cake, and coat both layers evenly. Chill until about two hours prior to serving.

**Peanut-Butter Bomb Variation**
You can turn Chocolate Death into a Peanut-Butter Bomb simply by filling the center with this great peanut butter mouse:

Peanut Butter Mousse Ingredients:

- 1/2 cup heavy cream
- 1 1/2 cup confectionary sugar
- 1 1/2 cup peanut butter
- 3/4 cup cream cheese
- 2 cups heavy cream

Method:

1. Blend 1/2 cup heavy cream with sugar, peanut butter, and cream cheese.
2. Whip 2 Cups of heavy cream (soft peaks) and fold into peanut butter mixture.
3. Proceed with instructions for the Chocolate Death Cake, above, but use a pastry bag to fill the center of the two layers with peanut-butter mouse instead of ganache. Top with the second layer, and spread or drizzle ganache over the entire cake. Decorate with miniature peanut-butter cups, if desired.
Orange Flan Cake

Yield 2—8 inch cakes
(16 servings)

Ingredients

Cake:
1 box yellow cake mix
2 teaspoons orange zest

Flan:
1 cup milk
2 tablespoons orange flavored liqueur or orange juice
1 teaspoon orange zest
4 egg yolks
2 whole eggs
1 can sweetened condensed milk

Caramel:
1 cup sugar
1/2 cup water

Method:

1. In 2 quart sauce pan, heat sugar and 1/2 cup water to boiling. Reduce heat to medium. Cook without stirring 18 to 22 minutes or until sugar turns light golden brown in color and is caramelized. Be sure not to burn caramel.

2. Into two un-greased 8 x 2 inch round, or three 6 x 2 round cake pans (do not use dark or nonstick pans), quickly pour caramelized sugar and immediately tilt pans so sugar covers bottoms; set aside.

3. Fill shallow pan half full with water and place on the middle oven rack. Heat oven to 325°.

4. In medium bowl, beat 1 cup milk, the liqueur or orange juice, 1 teaspoon orange zest, egg yolks, whole eggs, and sweetened condensed milk with wire whisk or fork until blended. Pour milk mixture over caramelized sugar in each pan.

5. In large bowl, prepare cake mix according to box directions. Spoon mixture evenly over milk mixture in pans.

6. Bake cakes in water bath on middle rack 45 to 55 minutes or until cake springs back when touched lightly in center. Cool 30 minutes; run knife or spatula around edges of pans. Place serving plate upside down on each pan; turn plate and pan over. Leave pans over cakes 1 minute so caramel can drizzle over cakes. Serve warm or cold. Store covered in refrigerator.

Apple Tart Tatin

This is the simplest, most delicious way to transform just picked Hudson Valley apples into an elegant dessert. For this recipe you will need an oven-proof skillet measuring 7 – 8 inches across the bottom, and 10 – 12 inches across the top. Cast iron works great, but they also sell pans made specifically for tart tatin in kitchen supply stores (recipe adapted from the *Joy of Cooking*).

Ingredients:
1/2 recipe CTI pie crust
3 pounds apples—experiment with your favorite varieties fresh from your local orchard. (We often use a mixture of Winesap, and Golden Delicious (about 6 large).)
8 tablespoons butter (1 stick)
1 cup sugar

Method:
1. Roll out dough to a 12 inch round. Refrigerate.
2. Preheat oven to 350°.
3. Peel, core, and quarter apples.
4. Melt butter in an oven-proof skillet (see note, above).
5. Remove pan from heat and sprinkle sugar evenly over butter.
6. Arrange the apples in concentric circles in the pan. Be sure that you nestle them very closely to each other—you don’t want any space left when you are done.
7. Return pan to highest heat possible and cook, gently stirring until the juices turn to a deep amber.
8. Remove skillet from heat and flip the apples with a fork. Return to heat and cook about five minutes more, or until the apples are golden on both sides.
9. Remove the skillet from heat. Organize the apples in concentric circles, then gently place crust on top of the apples, tucking the sides in around the edges.
10. Bake for 25 – 30 minutes, or until crust is golden brown. Cool ten minutes on a rack, then flip onto a serving platter to serve.

Chef’s note: The tart can sit in the skillet at room temperature until you are ready to serve, but you must warm the bottom over the stove before you attempt to release the tart from the skillet. Once the caramel is warmed and loosened, slide a knife around the edge of the skillet, then flip the tart over onto your serving dish.

In the spring you come into sight  
By the end of summer you’re nice and ripe  
I like them all— yellow, red and green  
Even more than jelly beans  
My favorite ones are juicy and crisp  
Just thinking of them makes me lick my lips  
Apples are just so delicious  
After eating one I feel ambitious

For the majority of my life I have been moved from home to home. Not having a steady life has sometimes been difficult for me. On the flip side, I have had a chance to experience things that not many people my age get to experience. Even though my location and families have changed the one thing that has been consistent is my love for food.

Although it was hard each time I had to move to new family, there was always the excitement of new tastes to discover. Living with different people was always weird at first. However, living with people who have different ethnic backgrounds and learning different ways of cooking was a great experience for me.

As a kid I had no idea I could make a profession out of my love for food. I wanted to know how dishes were made, why food changes appearances, and why the flavors mix together in certain ways. I was curious and I was a nosy little girl. I remember living with a Jamaican family and having oxtails, curried chicken, and jerked goat for the first time. I thought that the food looked disgusting, but the aroma lured my nose right to the plate; it was unforgettable. It felt like my senses were ten times more powerful. My mouth watered, and my stomach was overwhelmed because of the allure of the food, which I couldn’t wait to eat. When I finally tasted it, all the flavors and spices surprised me. It made me so happy and I asked lots of questions about what was in the dishes. The short time I was a resident in that home, I always observed the whole cooking process. Since the moment that I ate that delicious, flavorful meal, I have craved the excitement of new food.

Since then I have lived with Hispanics, vegetarians, Italians, and many different types of people. In 2005 I finally met my permanent family. Both of my parents are decent cooks, but usually I do the cooking now. When I first started cooking for my family, I never considered that I could someday become a chef. The first time I heard of the idea I was skeptical, mainly because I was unsure if I could do it. As time went on my skills, my knowledge, and my passion for the culinary arts increased dramatically. I changed my mind and decided that I could become a chef. My parents and siblings supported me when I made my decision to go into the culinary arts field, and after two years here at Dutchess County BOCES Career and Technical Institute, I am looking forward to many more years of new food discoveries in my career as a professional chef.
